DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ennis (US 4354291).

Regarding claim 1, Ennis discloses a washing apparatus having an oblong brush (48), a driving means (56), a flexible carrying element (100), which allows the brush to have a vertical orientation in the absence of a force and a horizontal orientation in the presence of a force. See figure 2 and 11.

Regarding claim 2, Ennis discloses an oblong flexible element (100). See figure 11.

Regarding claim 3, Ennis discloses a tubular flexible element (100, 102). See figure 13.

Regarding claim 4, Ennis discloses a coil spring (102) for the flexible element (100). See figure 13.

Regarding claim 5, Ennis discloses a driving means (56) rigidly connected to the brush (48). See figure 13.

Regarding claim 6, Ennis discloses a driving means (56) connected to a brush (48) by way of a flexible connection (100). See figure 11 and 12.

Regarding claim 7, Ennis discloses a driving means (56) designed for rotating the brush (48) about its longitudinal axis. See figure 13.

Regarding claim 8, Ennis discloses a driving means (56) designed for moving the brush (48) in a plane parallel to the longitudinal axis of the brush. See figure 13.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ennis (US 4354291) in view of Korfgan (US 4614449). Ennis is discussed above. The claim differs from Ennis in calling for drip-feeding a treatment agent above the brush. Korfgan discloses a cleaning brush (1) with a passage above the brush for liquid to flow through onto the brush. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Ennis's washing apparatus in view of the teachings of Korfgan to include a means for drip-feeding a treatment agent onto the brush for the purpose of providing a cleaning agent to the brush.
